ELECTRICAL SERVICE CALL
SPECIFICATIONS & PROPOSAL

An Electrical service call involves visual inspection, testing procedures, and corrections of minor problems in the electrical system of a home. Typical service calls may involve issues with improper grounding, exposed wiring, knob & tube wiring, or wiring issues at the heating equipment or electric water heaters. A licensed electrical contractor shall provide the services that are required for individual jobs on a time plus materials basis.

The electrical contractor shall perform basic services at an hourly rate (as specified below) with materials to be charged at cost plus percentage indicated below.

If your firm agrees to provide the above services and would like to be considered for Electrical Service Calls, please indicate the minimum labor charge for a typical service call, the hourly rate for additional services, and sign and date below:

Electrical Service Call minimum charge $_____

Additional electrical service, hourly labor rate $_____

Electrical materials = cost + %_____

x_____ Date:_____
