Weatherization delivers energy saving services to families who live on low incomes, and they'll see it when they get their utility bills!

Weatherization crews can:

- install attic, wall and floor insulation to keep customer homes safe and healthy
- seal ductwork and other leaks to make homes warmer in winter and cooler in summer
- clean and tune furnaces to keep inside air safe and healthy
- replace showerheads and incandescent light bulbs with energy saving devices to lower heating and cooling bills

One family wrote "...my light bill was under \$100 the month following the work on my home. It's never been that low. The last 2 months my bills were \$72 and \$52 and I am thrilled."

Another customer used to have to put her thermostat on 80 degrees to stay warm. "Now I put it much lower!" she wrote.

Weatherization services are available to families who live on limited incomes whether they own or rent their homes. The program gives priority to customers who

- are over 60 years of age
- are disabled
- have a high monthly energy burden
- have young children

Buncombe County Council on Aging takes applications for our Weatherization Services throughout Buncombe County at a variety of locations, including in the customer's home!

The Council's work in this area is a part of its "Seniors Safe at Home Program," which helps our seniors access a wide variety of services that keep them safe and healthy in their own homes.

You may qualify for services and not even know it. To learn more please contact us.
